

Another Royal Suggestion MUFFINS and COFFEE CAKE

From the NEW ROYAL COOK BOOK

BREAKFAST is too often eaten as a duty rather than a joy. The Royal Educational Department presents here some breakfast dishes that will stimulate the most critical appetite.

Muffins
2 cups flour
1 tablespoon Royal Baking Powder
1 tablespoon sugar
1/2 teaspoon salt
1 cup milk
1/2 cup shortening
Mix together, flour, baking powder, sugar and salt; add milk, well-beaten eggs and melted shortening; mix well. Grease muffin tin and add two tablespoons of batter into each. Bake in hot oven 20 to 25 minutes.

Coffee Cake
2 cups flour
1/2 cup sugar
1/2 cup shortening
1/2 cup milk
1/2 cup butter
1/2 cup raisins
1/2 cup nuts
Mix dry ingredients; add melted shortening and milk; add raisins and nuts; add butter; mix well. Bake in moderate oven 30 minutes.

GOOD CARE OF ALL IMPLEMENTS WILL SAVE MANY REPAIR BILLS

Leaving Implements to the Mercy of the Weather Costs Money.

In this day of complicated machinery most farmers probably give little thought to the care of their implements as a whole. But more effort has been expended in the slow process of developing this seemingly simple tool than in that of any other implement on the farm. It is the basic tillage tool, the fundamental farm implement, and it is richly entitled to be properly cared for when not in use.

Store in Dry Place.

When laid by, say the implement experts, the plow should, if possible, be stored in a dry place, away from contact with the ground. In any case, the bright parts should always be coated with grease to prevent rust. The mold board and share have become pitted with rust, an efficient job of plowing cannot be done until the corroded parts again have acquired a polish by use.

The United States Department of Agriculture, of course, does not stop with the plow in its admonition in this regard. Harrows, also relatively simple but tremendously important implements, are, next to plows, most generally neglected. Many farmers who would not neglect an expensive harvesting machine, say the experts, are careless as to harrows and other implements of this type. But these also represent capital invested, and a larger return is possible if they are properly cared for at the end of the season.

If harrows are stored under a shed the threat should be supported by blocks or boards, so that they will not become embedded in the ground. All accumulations of earth and trash should be removed. This is especially applicable to wooden-frame harrows. The earthy accumulations retain moisture and accelerate decay. When the wooden parts have dried out sufficiently they should be painted, to prevent season checking and splitting. As the harrow works in wet earth and close to the ground, deterioration is rapid once checking has started.

If the disk harrow is stored in a shed or other building, the disks should be run upon boards, so the disks will not become embedded in the ground. Whether housed or not, the implement should be carefully cleaned of all accumulations of soil, and the disks should be greased with a heavy grease to prevent rust. The

plow, particularly on the wooden parts, should be renewed frequently. Get Harrow Under Shelter. Mowers, more generally than plows and harrows, are put under shelter, but many of them spend the winter at the edge of the meadow where the last cutting of hay was made, and in most cases they are not properly greased, even when sheltered. Get the mower under shelter if possible. In any case, clean the knife bar, wipe it with a greasy rag, and store in a dry place. Place a block of wood or other support under the mid-point of the tongue, so that it will not acquire a permanent sag. If the mower is stored with the cutter bar in a vertical position, place a block of wood under the shoe, to take the weight off the frame. All accumulations of vegetable matter and dirt should be removed and all bearings and other bright parts of the machine oiled or greased. Much the same rules apply to reapers and binders.

The time to care for each implement is when it is laid by. Pressure of other work, however, frequently makes this inconvenient, but nothing should be allowed to interfere with getting all machinery greased, and, if possible, under cover, before the beginning of winter. Then, as early in the winter as you can find time for it, go over every piece and see what repairs are needed. If new parts have to be ordered, order them at once. A great deal of valuable time is lost every spring waiting for repair parts to arrive from the city.

The best possible use should be made of such housing space as is available, and grease and paint should be used without stint. Any farm implement with bearings and bright parts well protected with heavy grease is better off in the weather than standing in a shed without any protection by grease or oil.

The United States Department of Agriculture has two bulletins—Farmers' Bulletin 946 and Farmers' Bulletin 947—devoted to the repair and adjustment of farm implements. With all implements safely sheltered for the winter, you have time to write for these bulletins and to use the information they contain in putting your implements and machines in the best possible condition for next season.

CO-OPERATION PAYS FARMERS

Formation of Society in Prentiss County, Miss., Follows Efforts of County Agent.

Co-operative marketing of all kinds of farm produce has been successfully worked out in Prentiss county, Miss. Buyers formerly went into the country and purchased at their own prices, often 25 per cent below the outside market. The county agent of the United States Department of Agriculture succeeded in getting the farmers to band a car of corn, each farmer's contribution being weighed separately and a record kept by one of the banks. The car netted 25 cents a bushel over previous prices, and the local market rate rose 25 cents as a consequence. A co-operative shipment of hogs follows, and after several successful experiences the Farmers' Co-operative association of Prentiss county, Miss., was organized and a regular marketing agent employed. This organization did a business of more than \$250,000 in 12 months, at prices considerably in advance of those formerly realized. Deposits in two local banks were more than doubled in two years.

LAND PLASTER VERY USEFUL

Tends to Preserve Nitrogen of Manure Rather Than Expel It—Good Stable Deodorant.

Land plaster, gypsum, or calcium sulphate should not be confused with lime, though it is similar in the respect that it acts on the elements of soil. Unlike lime, gypsum will not correct acidity, but it has the advantage of changing ammonium carbonate, which is volatile, into the stable form of ammonium sulphate. For this reason it is exceptionally useful as a deodorant and absorbent in stables. It tends to preserve the nitrogen of manure rather than to expel it, as do burned and hydrated lime, and therefore it is quite generally recommended as a preservative for poultry manure as well as other sorts.

BIG SAVING OF TEAM POWER

Pays to Carry Along Well-Tempered File and Keep Plow Edge in Cutting Condition.

If the plowshare is a bit soft it will pay well, in the saving of team power, to carry along a well-tempered file, and keep the edge in cutting condition. It's surprising how a rounded edge on the share makes the team lay into the collar, and consider the price of oats and hay, such use of horseflesh is a bit too expensive.

Eggs From a Pullet.

Each hen in her pullet year should produce 10 dozen eggs, poultry specialists of the United States Department of Agriculture say.

Eggs That Cost Little.

Remember that eggs produced by the backyard flock cost very little, as the fowls are fed largely upon waste materials.

Fix Up Around Farm.

Cessation of work with crops should give time to fix up around the farm.

STARLING PREYS UPON BUGS

Spends Endless Hours Searching for and Destroying Insects—Birds Frighten Easily.

Because of conflicting opinions concerning the starling as an economic factor in the United States, the bureau of biological survey, United States Department of Agriculture, in 1910 began an extensive field investigation of its food habits, supplemented by careful laboratory examinations of stomachs of thousands of the birds. These investigations have proved that most of the starling's food habits are either beneficial to man or a neutral character. The time the birds spend destroying crops or molesting other birds is extremely short as compared with the endless hours they spend searching for insects that destroy plant life, or feeding on insect fruits. In the opinion of ornithologists of the biological survey the farmer will be well rewarded by allowing a reasonable number of starlings to conduct their nesting operations on the farm, and that later in the season a little vigilance will prevent the birds, which are easily frightened, from exacting too great toll for services rendered in destroying insects that ravage crops.

LESPEDEZA OF GREAT VALUE

One of the Most Valuable Forage Crops for Southeastern Part of the United States.

Lespedeza, also commonly known as Japan clover, is one of the most valuable forage crops for the southeastern part of the United States. Except on alluvial bottom lands, it rarely makes sufficient growth to justify being cut for hay, nevertheless its widespread adaptation to grazing conditions gives it a value that is difficult to estimate. Being a legume, it is valuable for soil improvement, and also it is relished by all classes of live stock. The United States Department of Agriculture has a new Farmers' Bulletin, No. 1143, on Lespedeza as a forage crop.

RIGHT ROOST FOR CHICKENS

Keep Them Out of Their Own Litter and Prevent Crowding Which Comes During Fall.

Chickens should be given a wide, low roost early to keep them out of their own litter and to prevent the crowding which comes on cool nights when they are huddled on the floor, but the roost should be really a narrow platform rather than a rail.

Cover Your Team.

No one with even ordinary care should leave a horse or mule uncovered while it is standing in extreme cold.

Operate on Business Basis.

Profitable farming is a matter of business and farms can be most successfully operated only on a sound business basis.

Bordeaux mixture Is the best remedy for the flea beetle, which is affecting second crop potatoes.

SUNDAY SCHOOL LESSON

(By REV. P. B. FITZWATER, D. D., Teacher of English Bible in the Moody Bible Institute of Chicago.)
(© 1920, Western Newspaper Union.)

LESSON FOR DECEMBER 5

THE GROWTH OF THE KINGDOM.

LESSON TEXT—Matt. 13:24-33.
GOLDEN TEXT—Fret not thyself because of evil-doers.—Ps. 37:1.
ADDITIONAL MATERIAL—Gal. 6:8-10.
PRIMARY TOPIC—Jesus' Story About Good Seed and Bad Seed.
JUNIOR TOPIC—The Story of the Wheat and the Tares.
INTERMEDIATE AND SENIOR TOPIC—Wheat and Tares.
YOUNG PEOPLE AND ADULT TOPIC—How the Kingdom of Heaven Grows.

The parables of this chapter set forth in a graphic way the condition of affairs in the interval between Christ's going away and His coming again.

I. The Parable of the Wheat and Tares (vv. 24-30, cf. 36-43).

1. The Sowers. (1) The Son of Man (v. 37). He is the One who sows the seed in the field in which the kingdom is the world. (2) The Devil (v. 39). He is in a peculiar sense Christ's enemy. He intensely hates Him, and with relentless energy is striving to defeat His purpose in saving men. While men slumber, he sows tares among the wheat.

2. The growing crops. They are not easily distinguished while growing, but the effects produced when eaten are quite different. The wheat is wholesome, but the tares produce illness in their resemblance to wheat. The chief danger of the devil is that he strives to imitate God.

3. The harvest. There comes a time when the fruitage of the growing crops shall be gathered for the tares.

There is a furnace of fire where there shall be waiting and gnashing of teeth. The righteous shall be gathered into the Lord's garner and shall shine forth as the sun in the kingdom of the Father.

II. The Parable of the Mustard Seed (vv. 31, 32).

1. Its important beginning. It begins as the least of all seeds and grows to be the greatest among herbs. The parable and humble circumstances of the King greatly perplexed the people. That twelve unlettered fishermen should be selected as His royal advisers is still more amazing. The prophet said concerning Him that He should be despised, rejected, forsaken.

2. Its vigorous growth. From very small beginnings the influence of the Christ has gone forth so that there is no power or influence so great as that of Christianity.

3. Its lodging capacity. The birds which find lodging in the tree do not molest the children of men which find safety and salvation in the church. Birds constitute no part of the tree. The bird is something foreign to and independent of the tree. The branches increase the growth of the tree, but birds are injurious and burdensome to it. They are predatory—waiting to pluck the tender buds or to prey upon the ripened fruit. The effect of such lodging is evil, blighting and spoiling to the tree. In Christ's interpretation of the parable of the sower He said that the fowls represent the wicked one (v. 19). The same Greek word is used in both cases, and the circumstances are the same; therefore, he who would make the lodgers here anything else makes Christ's interpretation a farce.

III. The Parable of the Leavened Meal (v. 33).

Three things should mainly occupy our attention in this parable: the meal, the woman, and the leaven. When the scriptural significance of these elements is known, the interpretation is easy.

1. The meal. Meal has a wholesome and nutritious effect. It was used in one of the sweet-savor offerings, which typified Christ (Lev. 2:1-3, R. V.); it was food for the people (Ex. 16:15-17, R. V.). Abraham had Sarah knead a cake out of three measures of meal for the angelic messengers (Gen. 18:6); Solomon's royal table was provided with meal (I Kings 4:22); Elijah was fed upon a cake made of meal (II Kings 4:41); Elijah's meal as an antidote for the poison of death in the pot (II Kings 4:38-41).

2. The woman. The woman is not the head of the home, but its administrator. Her responsibility is to take the bread provided by the head, prepare and distribute it to the children. In Scripture we find false doctrine being taught by a woman (Rev. 2:20). Dealing with doctrine is forbidden to woman (I Tim. 2:12). In I Tim. 4:1-3; II Tim. 2:17, 18; 4:3, 4; II Pet. 2:1-3, we find that apostasy will be brought in through false teachings within the ranks of God's people.

The meaning, then, of the parable is that the true doctrine, the meal given for the nourishment of the children of the kingdom (II Pet. 2:2; I Tim. 4:6), would officially be corrupted by false doctrine. The children's food is corrupted by the mother.

3. The leaven. In Scripture, leaven is invariably a type of evil. Let the following examples suffice as proof: (1) All through the Old Testament leaven is a continual and unwelcome type of evil (Ex. 12:15; Lev. 2:11). (2) Jesus himself makes leaven to denote sin (Matt. 16:6, 12; Mark 8:15). (3) Paul uses leaven in its usual biblical sense (I Cor. 5:6-8; Gal. 5:8, 9).

The Church.

The church is the representative of Christ on earth, but what sort of an impression does it make on the world if its members are disaffected and disorganized, and careless about their spiritual life? Many blessings are gained from sincere and regular church attendance, but beyond and above all these is the great reason that the presence of every Christian helps to build that glorious church (Eph. 5:27), without spot or wrinkle or anything such thing, of which we are the several members when fitly joined together.

Nothing Too Little.

Our Lord teaches that nothing is too little to be ordered by our Father, or any such little in which to see His hand, nothing which touches our souls too little to accept from Him, nothing too little to be done for Him. Since the hairs of our head are all numbered, so is every tress or shoot or path, every beating or aching of the heart. Every tear which starts is seen, and if wept to Him is gathered up to Him. Every secret wish and prayer He hears while yet muttered or unformed.—Dr. Pusey

The KITCHEN CABINET

(© 1920, Western Newspaper Union.)

There are two words in the English language, simple words in themselves, yet they have caused untold misery. They have broken friendship, disrupted homes, broken hearts and killed people. Those words are "they say."—Hunter.

SOME EASY DESSERTS.

A canned berry pudding is delicious and may be prepared from any kind of berries. Spread slices of bread with butter and arrange in a baking dish; cover each layer of bread with berries, sweeten if necessary and repeat until the dish is full. Bake a half-hour in a moderate oven. Serve hot with sugar and cream or a hard sauce.

Fancy Pastry.—Stir together one cupful of pastry flour, one-fourth of a teaspoonful of salt, the same of baking powder and two tablespoons of sugar. With two knives work in half a cupful of butter, or butter substitute. Add an unbeaten yolk of egg; mix the juice of one lemon with half a teaspoonful of water and with the knife gradually work the liquid into the egg and flour mixture. Turn upon a board dredged with flour, pat and roll into a sheet, fold making three layers, fold and roll again, repeat the rolling after folding two or three times, then roll thin and use to line the tins. This pastry may be used for individual pies of any kind.

Lemon Cheese Cakes.—For the filling for five individual pies, take one egg, three tablespoons of sugar, one-fourth of a teaspoonful of salt, the grated rind of one lemon, one large tablespoonful of lemon juice, one-fourth of a cupful of sifted sponge cake crumbs. Beat the yolk of the egg, add the sugar, salt, lemon rind and juice and the cake crumbs; mix thoroughly, then fold in the white of the egg, beaten dry and turn into small tins lined with pastry. Bake until the filling is set.

Banana Pie.—Press through a ricer enough ripe bananas to make a cupful, add one-half cupful of sugar, two tablespoons of molasses, one-fourth of a cupful of salt, one beaten egg, one-half teaspoonful of cinnamon, half a cupful of milk, and one-third of a cupful of cream. Mix thoroughly and bake in a plate lined with pastry.

"The ill-timed truth we might have kept—
Who knows how sharp it pierced and rung?"
The word had not sense to say—
Who knows how grandly it had rung!"

WHAT TO HAVE FOR DINNER.

As oysters are again in the market the following diet will be a change from the ordinary way of serving them.

Oysters with Macaroni.—Cook three-fourths of a cupful of macaroni broken into inch pieces until tender. Scald one pint of oysters. Put a layer of buttered crumbs, macaroni, cheese, using three-fourths of a cupful of cheese and half a cupful of crumbs with a teaspoonful of salt, four tablespoons of butter, a few dashes of paprika and the oyster liquor. Repeat until all the ingredients are used, and cover with buttered crumbs. Bake thirty minutes in a moderate oven.

Cranberry Salad.—Cook together one quart of cranberries with one pint of boiling water twenty minutes. Put through a sieve and add two cups of sugar; cook five minutes. Dissolve one and one-half tablespoons of gelatin in a little cold water, add to the hot cranberry sauce and stir until well mixed. Just before it begins to set pour half of it into an enamel pan which has been rinsed in cold water. Allow it to become firm, keeping the rest warm over hot water. Sprinkle one cupful of diced celery, one-half cupful of diced watermelon over the stiff jelly and pour the remaining gelatin mixture over this, and allow it to set. When firm cut in slices and serve on lettuce leaves with mayonnaise dressing; garnish with whole nut meats.

Peanut Butter Biscuits.—Stir together two cupfuls of pastry flour, four tablespoons of baking powder and half a teaspoonful of salt. Put in three tablespoons of shortening and add milk to make a dough that leaves the bowl. Turn on a flour-dusted board and roll into a sheet. Spread the dough with peanut butter and roll as for cinnamon rolls. Cut in pieces and bake in a buttered pan twenty minutes.

Bunch Cheese.—Soak one-half cupful of tapioca overnight. Drain one-half can of pineapple from the juice, divide one and one-half oranges into sections and cut the pulp in pieces. Add the juice from the pineapple and add to the drained tapioca, with a few grains of salt and a cupful of sugar, and cook until the tapioca is transparent, adding a very little water if needed. Cool slightly, add one egg white beaten stiff, then turn in the pineapple and orange bits. Chill. Serve in sherbet glasses with a garnish of whipped cream and chopped marshmallow cherries.

Marie Maxwell

OTHER DISHES.

Grape Juice Turkish Paste.—Soften three and one-half tablespoons of gelatin in half a cupful of cold water; dissolve two cupfuls of granulated sugar in two-thirds of a cupful of grape juice. Combine mixtures and boil twenty minutes from the time boiling begins. Add the juice of half a lemon and turn into a bread pan to harden. Slip the candy from the pan, stir confectioners' sugar over it and cut in squares. Roll in sugar and set aside.

Another sweet sandwich: Cut marshmallows very thin by flouring the scissors and snip them in bits. Spread thinly buttered white bread with butter and sprinkle the marshmallows thickly on the bread. Now add chopped peanut meats. This mixture tastes particularly good and is most attractive when cut in pretty shapes.

When it is possible for the child to obtain a cupful of hot soup or chocolate or milk with his lunch, the lunch basket need not be so heavy with food.

Then it is Genuine

Warning! Unless you see the name "Bayer" on tablets, you are not getting genuine Aspirin prescribed by physicians for 21 years and proved safe by millions.

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains proper directions for Colds, Headache, Pain, Toothache, Neuralgia, Rheumatism, Neuritis, Lumbago.

Handy tin boxes of 12 tablets cost but a few cents—Larger packages, Aspirin is the trade mark of Bayer Manufacture of Monacacetamide of Bayer AG.

Knows Better.
Mrs. Gray—"Does your husband expect you to obey him?" Mrs. Gray—"Oh, no! He's been married before!"

WHY DRUGGISTS RECOMMEND SWAMP-ROOT

For many years druggists have watched with much interest the remarkable record maintained by Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder medicine. It is a physician's prescription. It is sold by all druggists on its merit and it should help you. No other kidney medicine has so many friends. Be sure to get Swamp-Root and start treatment at once. However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper—Ad.

Up in the Air.
"He hung upon her words."

Cuticura Soap for the Complexion.
Nothing better than Cuticura Soap daily and Ointment now and then as needed to make the complexion clear, scaly clean and hands soft and white. Add to this the fascinating fragrance of Cuticura Toilet and you have the Cuticura Toilet Trio.—Ad.

Narrow Minded.
A narrow-minded man is one who won't admit it, but really believes that the world would be better off if there were no one living on it but himself.—Detroit Free Press.

Waste of Time.
"I can read Regie like a book."
"You shouldn't waste your time on such stupid literature."

Kill That Cold With HILL'S CASCARA QUININE FOR Colds, Coughs AND La Grippe

Neglected Colds are Dangerous. Take no chances. Keep this standard remedy handy for the first attack. Breaks up a cold in 24 hours—Relieves Grippe in 3 days—Excellent for Headache. Quinine in this form does not affect the head—Cascara is best Tonic Laxative—No Opium in Hill's.

ALL DRUGGISTS SELL IT

IN EVERY STABLE Spohn's Distemper Compound

It is the one indispensable remedy for contagious and infectious diseases among horses and mules. It cures distemper, coughs and colds for twenty-six years. It is the highest tribute to its merit as a medicine. It is endorsed by the best horsemen and live stock men in America. Buy it of your druggist. 60 cents and \$1.20 per bottle. SPOHN MEDICAL CO., Goshen, Ind., U. S. A.

When Children are Sickly

are Constipated, Feverish, Cry out in their sleep, Take cold easily, Have Headaches, Stomach or Bowel trouble, Try

MOTHER GRAY'S SWEET POWDERS FOR CHILDREN

They are pleasant to take and a certain relief. They act on the Stomach, Liver and Bowels and tend to correct intestinal disorders. 10,000 testimonials from mothers and friends of little ones tell of relief. No mother should be without a box of Mother Gray's Sweet Powders for use when needed. Ask today. At Druggists. The need of them often comes at inconvenient hours.

Used by Mothers for over thirty years. Do Not Accept Any Substitute for MOTHER GRAY'S SWEET POWDERS.

SAYS THIS COUGH MEDICINE CANNOT BE BEAT

CHEAP, PLEASANT AND DOES THE WORK

"It is a real pleasure to me to tell people how I was so wonderfully helped by Glando-Pine cough remedy. I took cold, which held on for several days. I felt so smothered and choked up I could hardly breathe. I coughed terribly. I was just about all in when I began to use Glando-Pine. The first dose made me breathe easier. I slept well the first night after I began using it. I continued to improve rapidly and in a few days was feeling good again. I am glad for the privilege of telling other people about this wonderful cough remedy, as I believe it saved me serious sickness. I was really alarmed about my cold."
"MRS. SOPHIA TREES, Paulding, Ohio."

It is really wonderful how quickly Glando-Pine eases up a cough or cold. It goes to the right spot. It is fine for inflamed or sore throat, throat tickle, hoarseness and croup. Children like to take it. If you are without a cough medicine in the home don't neglect to get a bottle of Glando-Pine (60 cents worth) and mix it with enough syrup to make a pint and you will have a family supply of the best cough medicine you ever used. Protect your home and save doctor bills. Directions for preparing go with each bottle. Remember to get Glando-Pine and you will have no regrets. The Glando-Pine Co., Fort Wayne, Ind.

Harvest 20 to 45 Bushel to Acre Wheat in WESTERN CANADA

Think what that means to you! Good hard dollars with the great demand for wheat at high prices. Many farmers in Western Canada have paid for their land from a single crop. The same success may still be yours, for you can buy on easy terms.

Farm Land at \$15 to \$30 an Acre
